# Bromsgrove Astronomical Society Update – August 2013

Visit to Leicester Space Centre - September 14th 2013.
There are still 5 places available on this trip.
To book please contact a committee member.
For those who have already booked, a reminder that payment is now due and that the coach leaves Finstall at 9am on the dot.

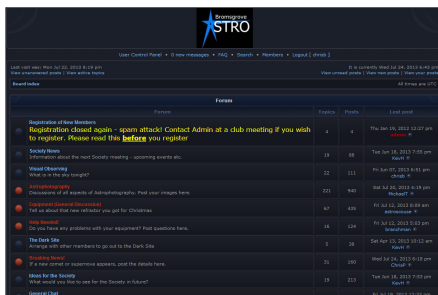

It's a Nova !

The brightest nova for many years has flared in the constellation of Delphinus near its border with Vulpecula. It is on the edge of naked-eye visibility but easily seen in binoculars. George has taken this superb image and posted more on the forum as the nova magnitude has subsided.
